C-ARM FPD

The new X-RAY generation
Digital Radiography Solution

Genève 40M

Mobile Dynamic FPD C-ARM

The C-ARM X-ray system features laser positioning for accurate and efficient positioning during procedures, reducing unnecessary radiation exposure. It offers customizable exposure settings for different surgical sites and body shapes, optimizing image quality and minimizing radiation dose. Real-time DAP dose display and statistics provide accurate monitoring of radiation exposure throughout the procedure. Automatic dose measurement technology under ABS fluoroscopy and IDC spot film ensures the lowest possible dose while meeting diagnostic needs and protecting both patients and healthcare providers.

ALL-IN-ONE

The Genève 40M C-ARM allows a seamless switch between its standalone configuration and combined use to meet different clinical scenarios

ADVANCED PATIENT VIEWING

The C-ARM is equipped with two high resolution 19" monitors, which can be easily adjusted to view and operate during surgery thanks to the 3-axis boom arm. The trolley is equipped with a 30" display, capable of showing every information that the operators need.

COMPLETELY INTEGRATED SYSTEM

Thanks to the touchscreen interface and the integrated image processing and viewing workstation, the operators can focus on what really matters.
